

What are your supply chain pain points?

With a steady stream of net-new innovations to contend with, packaging changes, regionalized supply and contract manufacturing to manage, consumer products companies can struggle to plan effectively for their supply chains.

KNOW SOONER, ACT FASTER WITH KINAXIS®

Using a single planning platform, Kinaxis unifies your supply chain planning to streamline your processes, break down silos and plan concurrently across every area of your supply chain – from S&OP to demand, inventory, supply and more.

Our supply chain planning solution for the consumer products industry lets you:

Overcome the challenge of channel complexity

Bring together fragmented enterprise resource planning (ERP) systems and supply chain processes and streamline multiple datasets to reduce inventory and costs.

See your supply chain from end to end

Full visibility gives you insight into planned and current demand, inventory, capacity, constraints and supply at every level of your product hierarchy.

Deal effectively with volatile demand

Adapt your supply chain faster to unpredictable demand, dynamic pricing decisions and increasingly personalized offers with agility and speed.

Say goodbye to cascaded planning

With concurrent planning, when a planner in one area makes a change, everyone else across the supply chain immediately sees the impact.

Digital transformation can happen faster than you think.

We can get you there sooner with the fastest, successful end-to-end advanced planning go-lives on the market. [Talk to us today to find out how.](#)
